DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, 15-21, 26 and 27, drawn to an antigen specific to E.risticii, pharmaceutical compositions comprising said antigens and methods of inducing an immune response using said antigens, classified in class 424, subclass 265.1.
 - II. Claims 11-14 and 22-25, drawn to nucleic acid molecules and host cells which will encode the antigen specific to E.risticii and methods of using said host cells to prepare a recombinant protein, classified in class 536, subclass 23.1.
2. The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I and II are biologically, chemically and structurally different and therefore they are patentably distinct and independent from one another. It would place an undue burden on the Examiner to examine these inventions simultaneously.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter and because the literature search required for the Groups is not coextensive, restriction for examination purposes as indicated is proper.

3. Correspondence regarding this application should be directed to Group Art Unit 1645. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Remsen. The faxing of such papers must conform with the notice published in the
